NEW IN 2018

2018 at Yarrawonga has seen us adopt new technologies and we have become a part of MerinoLink's DNA program. This will allow us to access full pedigree information on the whole 2018 drop. This program aims to help us to double our rate of genetic gain over a five year period.

What this means for you!

While our genetic gain is increasing our clients gains are as well, ultimately increasing profitability.

We are also utilising Smart Shepard collars. These allow us to collect data on dam pedigree, whilst also collecting data on fertility.

If there are any questions that we can help you with please contact us.

Whilst the season is providing us all with challenging decisions, confidence must remain in the industry while ever the wool market is performing at untapped highs and sheep and lamb markets are continuing to provide us with excellent returns.

IF THERE WAS EVER A TIME TO SELECT THE RIGHT GENETICS IT IS NOW!

Yarrawonga takes pride in supplying quality genetics at a commercially viable price.

ASBV's ARE AVAILABLE ONCE AGAIN VIA OUR WEBSITE OR ON SALE DAY!

Ram Sales

Yarrowonga offer a large amount of rams each year at auction. This is the only opportunity for clients to purchase our genetics as we don't sell at any multi-vendor sales. This means that our sale consists of stud and commercial rams.

Last year we offered 240 rams. We are passionate about supplying quality genetics at affordable prices. This number of rams meant that commercial clients were able to purchase these genetics, with 100 rams sold below \$2000.

We supply ram packages for all budgets!

New clients Bill and Marg Mackey have seen great results in their F1 Yarrowonga crosses with an increase of half a kilogram fleece weight compared to their contemporaries as well as averaging 17.1 micron, yielding 72% and a staple strength of 61. This equates to a \$5.60/DSE increase in one generational cross.

Long term client John Phillips this year reaped the rewards from having good genetics combined with a great wool and mutton market. His adult wethers grossed him a massive \$218/DSE.

2017 DROP SEMEN SIRES

YCFW
YFD
YWT
MP+
FP+

Yarra 1162 has massive sire potential, August born he displays true purity and balance. His deeply crimped wool has great lustre. He has an unblemished muzzle and face. He stands tall with great neck extension and length of body.

This 11/11 grandson that's "Bred in the purple" has great eye appeal his purity, growth and structure combined with nourished fine/medium wool with plenty of bounce that fills bales. He's the best young horn sire prospect I've seen in 2018.
