**Measured Performance Data**

- Sire Sire of the Ram
- Poll/Horn PP – DNA poll test
- FD Fibre Diameter – the mean fibre diameter in microns of all the fibres measured
- SD Standard Deviation of the fibre diameter.
- CV Coefficient of Variation of the fibre diameter
- COMF Comfort Factor – percentage of the fibres under 30 micron

**Australian Sheep Breeding Values (ASBV's)**

- YCFW Yearling Clean Fleece Weight (kg) Rams with higher YCFW ASBV's will produce progeny that will cut more wool.
- YFD Yearling Fibre Diameter (µm) Rams with more negative YFD ASBV's will produce progeny which are finer.
- YWT Yearling Weight (kg) Rams with more positive YWT ASBV's will produce progeny that grow quicker and are heavier at a certain age.

**Selection Indexes**

- DP+ *Dual Purpose Plus Index* – ranks animals on their ability to produce merinos for dual purpose operations. The index is aimed at producers whose majority of seep income comes from sheep sales. It is for self-replacing merino flocks that do not keep their wethers and also join a portion of their ewes to terminal sires.
- MP+ *Merino Production Plus Index* – ranks animals on their ability to produce progeny for a fine wool operation that has significant surplus sheep sales. The index is aimed at producers whose sheep income is a balance of both wool and surplus sheep sales. It is for self-replacing merino flocks who do not keep their wethers to produce wool.
- FP+ *Fibre Production Plus Index* – ranks animals on their ability to produce progeny for a fine wool operation that retains a proportion of wethers. The index is aimed at producers whose majority of income is from the wool clip with a focus on wool quality. There is a focus on improving fleece weight and fibre diameter and also includes staple strength, worm resistance and reproduction.
